Best Practice Advice

- . **Building and construction related projects** should meet or exceed Australian standards wherever reasonably practicable to do so. Departure from Australian WHS standards on the basis that meeting such standards is not “reasonably practicable” should only be accepted where it is defensible to do so, supported by a clear, persuasive and documented explanation.
 - In such cases, the project should meet the highest standard that is reasonably practicable with hazard mitigation measures supported by a hazard identification and risk assessment report identifying the residual risks of injury and illness to any workers or third parties, and proposed mitigation strategy.
- . If the project involves working with children, or contact with children, the organisation must have a **Child Protection Policy** or code of conduct to be eligible.
- . Recipients of DAP funding must ensure that no support or resources are provided to any entity subject to **sanctions** (by the United Nations Security Council or the Australian Government).
- . Recipients of DAP funding must ensure that the work conducted in relation to this project is undertaken in a safe manner and complies with all applicable local laws, standards and policies that relate to **health and safety**.

What is the DAP Project Timeline?

- . Generally short-term – acquitted before the end of the financial year (June 2018).
